our mini guide for...

Bio Fizzy Tablets

DELPHIS eco PROFESSIONAL CLEANING

Application and Directions

Fat traps and drain line maintenance: Dissolve one tablet into a sink or bucket with 4-5 litres of tepid water. Remove the sink plug or pour the solution evenly into all drain lines. Repeat monthly.

Toilets and septic tank maintenance: Dissolve one tablet into a toilet bowl and flush. Use one tablet per month for each tank capacity of 4,500 litres.

NB: Do not use with anti-bacterial products and cleaners.

Proper dosage saves cost and minimises environmental impact:
Delphis Eco encourage proper dosage and users to reduce waste going to land fill by recycling empty bottles.

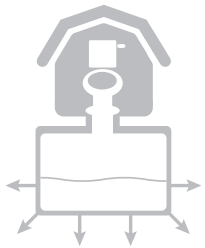

before...

- Natural biomass dies due to use of chemicals and overload. This causes the pit to fill up with solid waste causing bacteria to breed and bad odours which attracts flies and bugs.The solid mass becomes congested and cannot seep away.

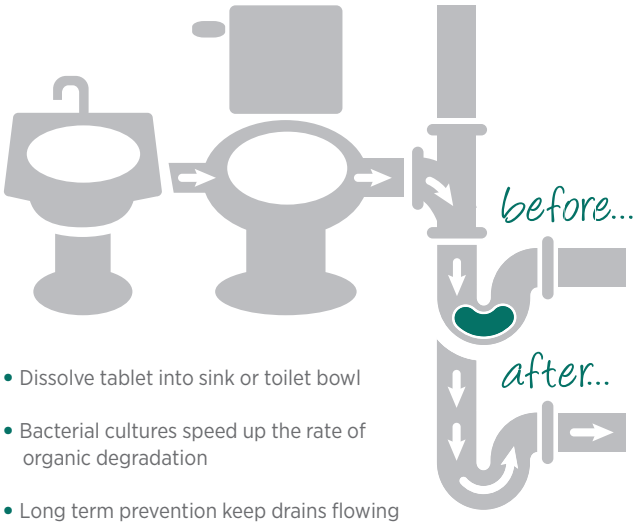

after...

- Bio Fizzy Tablets turn the solid mass to liquid reducing it to water and carbonate to help eliminate bacteria, blockages, smells and reduce pumping.Clean liquid can percolate through the ground without contaminating the ground water.

Main Use

- Dissolve tablet into sink or toilet bowl
- Bacterial cultures speed up the rate of organic degradation
- Long term prevention keep drains flowing

COSHH

Health and Safety

Use only as directed. Do not mix different cleaners. Seek medical attention if in discomfort or if any symptoms persist.

Eye Contact: Avoid contact with eyes, if product gets into eyes, rinse with water.

Skin Contact: Avoid contact with skin, if product gets onto skin wash with water and remove any contaminated clothing.

Ingestion: Do not drink, if swallowed drinking water may be beneficial, do not induce vomiting.

Inhalation: Avoid inhaling product, move to fresh air if in discomfort.

don't forget PPE...

Always wear the correct protective clothing if required. For best results we recommend using the correct dosing and colour coded microfibre cloths - please ask your manager for details.

how to dispose...

Dirty, used washing solution should be disposed of via drains that lead only to foul sewers. Do not allow detergent solutions to contaminate surface water drains. In the event that concentrated product should need to be disposed of, run small amounts to foul waste, diluting with plenty of water. For larger quantities, seek advice on disposal from the local authorities. Delphis Eco products are packed in fully recyclable containers. Empty containers should be rinsed thoroughly, the washings being run to foul waste. The containers may then be sent for recycling. Dispose of all waste in a responsible manner. Be aware of the environment.
